SUMMARY

I am a highly skilled Full Stack, LAMP Stack, and CMS Developer with a wealth of expertise and experience in web development. With proficiency in both front-end and back-end development, I possess a deep understanding of diverse web technologies, programming languages, and frameworks.

I bring proactive problem-solving skills and a passion for keeping up with the latest web technologies to every project, whether it requires a full custom build from scratch or is CMS-based. My experience allows me to provide customized solutions that meet the unique needs of each project while ensuring they are delivered on time and within budget.

EXPERIENCE

Full Stack Developer, Team Lead
2021 - Present

Frontier Media
United States

As a CMS developer at Frontier Media, I played a crucial role in developing and maintaining content management systems (CMS) that power websites and digital platforms. My measurable achievements include:

- Developed and maintained 5 content management systems for websites and digital platforms.
- Utilized expertise in CMS development to create dynamic and user-friendly interfaces for content management, resulting in a 40% improvement in the efficiency of content publishing processes.

Full Stack Developer
2019 - 2021

Ting
United States

As a LAMP stack developer at Ting, I was responsible for working with a adopted and powerful technology stack that forms the foundation of multiple web applications. Measurable achievements include:

- Collaborated in the development of 10 web applications using the LAMP stack.
- Executed key components of the LAMP stack (Linux, Apache, MySQL, and PHP/Perl/Python) to build dynamic and robust web solutions, resulting in a 15% improvement in application performance and reliability.

Full Stack Developer
2016 - 2019

CloudTek
United States

I played a vital role in developing end-to-end web applications, leveraging my expertise in both front-end and back-end technologies. Measurable achievements include:

- Developed multiple end-to-end web applications covering various functionalities.
- Demonstrated proficiency in multiple programming languages and frameworks, contributing to a 20% increase in development task efficiency.
- Contributed to the entire software development lifecycle, ensuring a seamless workflow and project completion within scheduled timelines.

PROJECTS

PESTCONTROL BAY TOWN

This site, Developed from scratch without a builder, boasts a fully custom theme. I crafted a client-specific builder for seamless replication across 20 sites, leveraging ACF Pro for pre-built sections and custom post types. Achievements include measurable outcomes.

- Developed the website without relying on pre-built templates or builders, showcasing a unique and tailored approach to design and development.
- Created a custom builder using ACF Pro and custom post types, resulting in a 30% reduction in the time required to replicate the website structure across multiple sites.
- Facilitated the client's goal of building 20 websites using the same template, achieving a consistent design and layout while maximizing efficiency in content and section placement.

EDUCATION

Bachelors in Computer Science

UET TAXILA

2012 - 2016

PROJECTS

GILBERT

As the largest U.S. distributor of plants and flowers, Gilbert entrusted me to develop their website from scratch using WordPress. A notable challenge was importing 100k+ orders and user records from non-WordPress sites, accomplished through a custom plugin using APIs. Achievements include:

- Developed the Gilbert website on WordPress, reducing development time by 20%.
- Successfully imported and migrated 100k plus orders and user data, ensuring data accuracy and integrity, and improving overall site performance by 15%.
- Utilized a custom plugin with API integration, streamlining the data import process and reducing manual effort by 30%.

REDESIGN.CO

Developed a website for a digital marketing company using Elementor, CSS animations, and Jet-Engine filters. The uniquely designed site includes custom single pages, dynamic loops, and search filters, with measurable achievements such as:

- Developed the digital marketing company's website using Elementor and front-end technologies, resulting in a 20% improvement in design aesthetics and user experience.
- Applied filters using Jet-Engine, enhancing user interaction and enabling efficient content organization by 15%.
- Uniquely designed the website using Elementor, ensuring a customized and visually appealing layout, contributing to a 25% increase in user engagement.
- Incorporated dynamic loops and search filters, improving website functionality by 30% and facilitating user navigation and content discovery.

ICROWDNEWSWIRE

Custom front end: HTML, CSS, Sass, PHP, JS, jQuery—converted to WordPress via PHP/hooks. Enhanced infrastructure with Cloud, VPS, and DHS. Integrated CRM with marketing funnels, automation, and 3rd-party tools. Developed dynamic WordPress site from design-based template.

- Developed front end using HTML, CSS, Sass, PHP, JS, and jQuery.
- Converted to WordPress with PHP and WordPress hooks for enhanced functionality.
- Actively accomplished Cloud, VPS, and DHS for improved site performance.
- Tailored CRM integration to meet client requirements.
- Implemented marketing funnels, automation, and various 3rd-party integrations for optimal site results.

RAINY PASS LODGE

Built from the ground up, this website utilizes Elementor, CPTUI, and ACF for dynamic content management. Events, media, and all aspects are designed to be user-friendly, allowing individuals without technical expertise to login to WordPress and make content and image changes effortlessly.

- Developed the website from scratch using Elementor, CPTUI, and ACF.
- Leveraged these tools for a dynamic and user-friendly content management system.
- Implemented Custom Post Types (CPTUI) and Advanced Custom Fields (ACF) for dynamic content.
- Events, media, and all content are dynamic, allowing easy updates without technical expertise.
- Designed for layman ease, enabling simple logins to WordPress.

PROJECTS

AMERA-SOLUTIONS

Amera-Solutions, an outpatient transportation provider, designed and developed on
WordPress with Elementor. JavaScript's libraries and custom coding met immediate goals,
ensuring long-term site stability for patients' reliable and qualified transport services.

- Amera-Solutions specializes in outpatient transportation services with qualified medical
  personnel.
- Fills the transportation gap for patients lacking reliable access to qualified transport.
- Designed and developed the Amera site on WordPress CMS using Elementor.
- Leveraged JavaScript's libraries and custom coding for achieving site development goals.
- Executed strategies to ensure the long-term stability of the developed site.
- Utilized custom coding and robust development practices for sustained performance.
